Work Experience

Dosito Ltd

Digital Developer - Hong Kong & Bangladesh   *2014 -*

Since the summer of 2014 I have been working as a freelancer for my own company Dosito, helping clients with Wordpress installation and theming, setting up web shops, and creating javascript based dynamic content for html newsletter send-outs.

Kaplan RM

Digital Developer - Sweden   *2010 - 2014*

At Kaplan RM I worked with a broad span of digital development. Everything from video, interactive design mock-ups, web sites and campaign material was given to me. My main focus was however on development in the CRM system Adobe Campaign (former known as Neolane).

LT9

Web Developer - India   *2009 - 2010*

LT9 is a Hong Kong based company that sells Nordic contemporary design to the Greater China area. I came in contact with the company during my time in India and took care of their entire website and built it from the ground up.

Wussap

Web Developer - India   *2009 - 2010*

Wussap was a start-up company that delivered a service called Surftrain. They had a vast amount of data but no web site. So I built their website and connected their database with the public web for users to interact with.

Prinfo

Web Programmer / Interactive Designer - Sweden   *2008 - 2009*

Prinfo is one of the biggest production offices in the Nordic countries with 47 different locations spread over Sweden, Norway and Denmark. While working there I built a lot of campaign web sites, but also produced variable data with javascript in their custom made web-to-print system.

Nostratic

Front-end Developer - Sweden   *2007 - 2008*

At Nostratic I built front-end layers to several different communities that were hosted on their own platform. Mainly the work consisted of PSD to HTML conversions.

Education

Nackademin

Advanced vocational training - Interactive Design   *2006 - 2008*

The training program gives the students the knowledge and skills to publish digital solutions in different channels. As well as theoretical studies the student is also sent out on internships every semester to develop and use their new found skills.

Stockholm University

University Program - Multimedia: Pedagogy & Technology   *2003 - 2006*

Multimedia: Pedagogy & Technology is an interdisciplinary training program at the Department of Education. The program aims to provide knowledge and understanding of man's relationship to digital media and communications technology. The program integrates pedagogy with digital media and communications technology. In pedagogy the subject is treated as users, creators and developers of technology. It also includes aspects of how we learn, communicate and act in digital environments.

Uppsala University

Independent Course - Computer Science   *2002 - 2003*

Computer science is the science of estimates at any execution, preferably those performed by computers.
